ENGR 689-602: Applied Blockchain for Engineers

Unlock new career opportunities in Blockchain.

OBJECTIVE

To equip engineers from all majors with a comprehensive understanding of blockchain technology, enabling them to design and implement blockchain-based solutions, develop smart contracts, and stay informed about emerging trends in blockchain application in engineering.

Blockchain rockstars from the industry will present short talks, and you can network with them.

Course Coverage

Blockchain thought process.
Engineering Applications
Bitcoins
Smart Contracts
Hands-on Exercises relevant to different majors
Emerging trends in Blockchains
Blockchain Security
(No prior coding expectations)

Instructor

Shreyas Kumar '05 is a Professor of Practice in the CSE department. He has worked at Oracle, Adobe, and Uber.
